Three independent runs produce one identical results file

SHA-256 of each run's own results.csv · 30 configurations, 9,000 cache decisions

Reference run macOS arm64 host	`f5497003…1ed044`	✓
Independent container run Linux aarch64	`f5497003…1ed044`	✓
Exact-search re-run brute-force nearest neighbour	`f5497003…1ed044`	✓

Precision and recall re-check: 60 of 60 comparisons with zero difference

Exact search changed no decision (largest gap 1.0×10^{-6} vs margin 0.000307)
